Related Coursework: Digital Media Art, Intro to Data Structures, Intro to Computer Science

PROJECTS

Globe Bank, SJSU, 06/20-Current

- Programmed a dummy website to learn how to use PHP and MySQL for full-stack web development.
- Developed a back-end infrastructure that supported the basic functions of CRUD.
- Initiated a dynamic front-end website to fully utilize a SQL database.
- Learned how to use PHP and MySQL to make scalable enterprise websites.

Mega Media, SJSU, 05/20-05/20

- Conceptualized a social media concept to visualize a twitter profile in 3D space.
- Built data structures to dynamically generate tweets.
- Created an easy to navigate 3D space with tweets randomly placed with a sphere.
- Learned how to data structures and embed HTML with Three.js.

Ancient Chinese Architecture, SJSU, 04/19-05/20

- Designed a website to present my research on ancient Chinese architecture.
- Focused on creating a responsive layout with CSS.
- Learned how to use HTML and CSS together to create templates.

Net Galaxy, SJSU, 04/19-05/19

- Constructed a website to express the negative feeling of not being good enough for a job.
- Created an interactive 3D space with different linkable puzzles that a user could try to solve.
- Gained a better understanding of Javascript, Three.js, and front-end file organization.

EXPERIENCE

Panda Cook, Panda Express, San Jose, CA

08/18-05/20

- Increased that amount of customers being served by prioritizing which entrées to cook during rush hours.
- Handled multiple tasks in the kitchen at once to meet the demand of customers.
- Managed other cooks in the absence of leads.
- Quickly prepared vegetables and meat for cooking.

SKILLS

Languages: C#, HTML, CSS, JS, PHP, MySQL, Bootstrap
